— Class A — Hepa

HEALTHCARE pro

Class A Hepa

This multifunction machine represents the beginning of a new generation of Class A vacuums.

The new dual stage vacuum motor warrants the lowest consumptions with 15% higher performances compared to the previous model.

ELECTRIC BROOM

Powerful, silent and very handy, it is standard equipped with the new patented Lindhaus M29R universal nozzle. The suction is perfect all around and the centre bristles are self cleaning.

For wood and marble floors a natural felt base is available (optional) and can be applied to the same nozzle.

The machine stands by itself in upright position making its use even more enjoyable.

A CARPET CLEANER FOR EVERY NEED

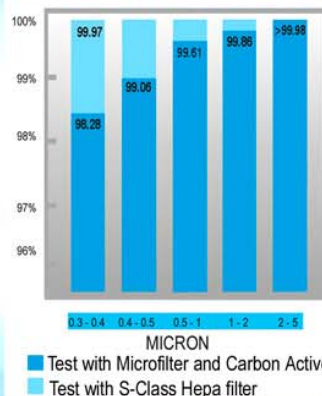

Thanks to its quick release neck, in a few seconds you can change from the electric broom function to the professional dual motor carpet cleaner.

The M30e - M38e power nozzles equipped with four wheels, height adjustment and electronic overload control are perfectly adaptable to any kind of carpets and rugs.

Thanks to the 5000 RPM brush roller with centre convergent bristles and its powerful suction, Hpro is able to deeply remove and suck dust and debris for a better living in healthier and cleaner rooms.

CRI (Carpet & Rug Institute U.S.A.) has approved all Lindhaus carpet cleaners for their superior dust removing and filtration ability.

NET EFFICIENCY FILTRATION

The filtration efficiency tests done on Healthcare pro Hepa by the independent laboratory IBR (USA) show the result of its advanced technology.

The new patented universal Lindhaus nozzle M29R with swivel neck and open all around can in fact be used on hard surfaces, carpets and rugs. The machine parked in upright position stands by itself.

BACK PACK KIT

With an easy optional back pack kit Healthcare pro Hepa becomes a practical and light weight back pack unit that allows the user to easily move in uncomfortable and tight environments like cinemas, theatres, stairs etc.

DRY CLEANING

In a few seconds and without any tool you can install the DCS converter to transform the M30e into a dry carpet cleaner. The Lindhaus neutral detergents are available for the maintenance of textile surfaces.

EXCLUSIVE ACCESSORIES

Healthcare pro Hepa is equipped with many standard and optional accessories.

The five-stage filtration system with 3M Filtrete exhaust microfilter is always at maximum levels and it is possible to obtain an almost absolute filtration for sanitary environments just by adding the optional Lindhaus Hepa filter. Healthcare pro is the most versatile Lindhaus commercial machine. It has in fact the following functions: electric broom, carpet cleaner, dry-cleaning system, vacuum cleaner, back pack and blowing.

Since Nov. 2001, Lindhaus is the official supplier of professional upright vacuums of the White House Washington D.C. (U.S.A.).

The price / quality relation is excellent *****
