Activa

30-38 pro

E.S.O. evolution

Activa 30-38 pro

E.S.O. evolution

Activa represents a new Generation of the highest Filtration vacuum/dry carpet cleaning machine all in one. This uniquely designed world class, single motor vacuum is light weight, and has two geared belts protected by a patented clutch system and an electronic overload control.

Extremely versatile, the Activa has all the tools incorporated into the back housing of the machine; it lies flat, which provides a very low profile for easy cleaning under furniture. It has interchangeable filtration options, 3M Filtrete (standard), optional carbon/active charcoal filter (to odors), or S-Class Hepa filtration.

You can count on the lowest possible sound level from the Activa, thanks to the superior engineering of all the components, and dynamic balancing of all rotating parts.

Converting the vacuum to a dry carpet cleaning system is as simple as installing a special conveyor. No tools required! For your convenience Lindhaus also offers many environmental safe carpet and upholstery cleaners.

SPECIAL FILTERS

Carbon Active filter/Microfilter S-Class Hepa Filter

The standard Activa is equipped with 6 stages of filters. At the final stage, an electrostatic microfilter (3M Filtrete), ensures more than 98% at 0.3 micron of filtration efficiency. Activa can be equipped with an Optional S-Class Hepa filter for healthcare environments, which ensures 99.97% filtration efficiency at 0.3 micron for extreme allergy concerns. To trap offensive odors, Lindhaus has developed a special carbon active/ microfilter cartridge.

Brush change

Nothing could be easier. No tools are required to change the brush roll or to clean the base housing. The patented clutch system and the electronic overload control protect the two cogged drive belts and the motor from overload or brush blockage.

- Handle grip with rubber cup
- Cord strain relief
- Upper cord hook
- Telescopic Handle
- 4 to 1 stretch hose
- Paper bag storage

MORE THAN JUST A VACUUM!

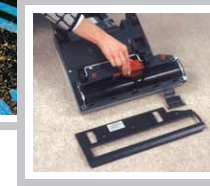

Extremely low profile

The sleek low profile design, and tools incorporated into the back housing, allows the machine to lie flat for easy access under furniture.

Dry cleaning system

Install the special Red Conveyor and you are now ready to dry clean your carpet. The Lindhaus environmentally safe cleaners are available for use on carpeting as well as upholstery.

Upright vacuum cleaner

The lightest and quietest of it's class, Activa is equipped with four wheels to smoothly follow the desired direction. The lowest possible barycentre allows the above the floor cleaning preventing the risk of falling off. The special (option) shoe plates consent the perfect cleaning of hard floors like: marble, wood, ceramic, etc.
