LINDHAUS®

QUALITY CLEANING EQUIPMENT

PB 12e-14e-14e pro 

RAISE YOUR EXPECTATIONS

The PB series was designed to improve the cleaning performance of any vacuum cleaning system. From back-packs to built-in systems the PB series will provide an extraordinary increase in cleaning efficiency. They can be retrofitted to upgrade almost any canister vacuum cleaner. Lindhaus engineered PB series to be the ultimate cleaning accessory. It is equipped with the most sophisticated technical features in the world.

ENGINEERED TO LAST

Long service life and low vibration levels, are achieved with superior engineering and precision manufacturing. All rotating components are balanced and protected by electronic controls.

ELECTRONIC LOGIC

Proven integrated circuits protect the motor and the transmission from overload and assist the operator in making the most efficient brush height setting.

DESIGN SUPERIORITY

Rugged and efficient power brush picks up what others leave behind. Our maintenance free power brush has a three-year warranty on the cogged drive belt. With non-marking rubber tires and an electrical switch position to stop the power brush motor, the transition to hard floor saves time and reduces airborne dust.

ENCAPSULATION CLEANING SYSTEM (Standard on PB12e - 14e)

The PB12e and PB14e have the built in Lindhaus patented Encapsulation System; a perfect solution to clean and wash carpets and rugs with no risk and minimal effort. The carpet is scrubbed with our high speed brush which activates the applied detergent. This quickly breaks up stains and loosens stuck on soils, which are released into the solution and dry to a perfect crystal, then simply vacuum away when dry.

PB14e pro PROFESSIONAL FOR HEAVY DUTY APPLICATIONS

This professional heavy duty power nozzle is equipped with stainless steel shoe plate, tool free quick brush side exchange, side cylinders for easy along wall cleaning, rear door for easy replacement of the motor protection filter, a more sophisticated electronic logic which control the overload, motor shut off, motor soft start and maintain the brush constant speed.
